PETKUS Moveable Seed Plant Solutions

Easy. Fast. Ready.

PETKUS moveable seed cleaning and seed coating plants offer a high degree of flexibility as well as cost savings through preassembled units on container frame. For processing, the units will be simply stacked one on top of the other and operated by plug and play. With this solution, the assembly time is reduced to a minimum. It is easy to implement at the customer's premises and can also be moved and transported as a whole system if required.

Access to all levels and areas of the moveable PETKUS systems is guaranteed by a circulating walkway system. The plants can be linked with each other.

- + Interesting concept of having a complete seed line in a semi-mobile container, e.g. fitting a frame matching two shipping containers and including de-awner, cleaner, indents and gravity table and/or treater.
- + Semi-mobile means that if the client's lease ends on the building, the seed plant can be packed up and be moved on somewhere else
- + These units can be delivered anywhere in the world. Simply unloaded and positioned on site for instant 'plug & play' operation
- + Line can be installed in 8 days by only 2 guys plus one day for the crane, depending on type of system
- + Unit is pre-wired with PLC, including remote support and WiFi connectivity
- + Gives a huge saving in both mechanical and electrical installation costs without compromising plant performance

Air sifter P 12
Indented cylinder ZA 73
Gravity table G 40
Conveyors

Moveable Seed Processing Line

based on 2 Shipping Container 40'		
Length	mm	14 600
Wide	mm	4 600
Height	mm	8 200
Weight (total)	t	30
Engine power	kW	100
Connector plug CEE	A	125

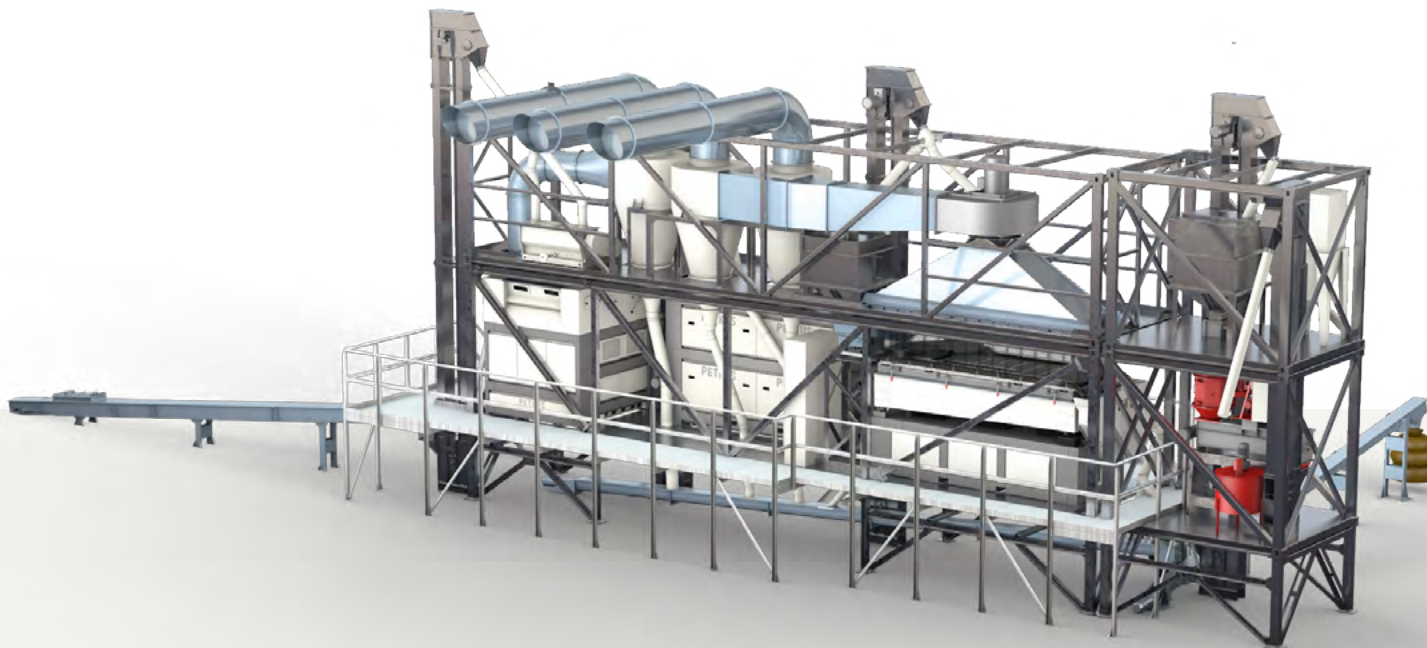

Seed treater CT 10
Aspirator
Rotary valve
Hopper with level sensor
Mixing tank
Conveyors

Moveable Seed Coating Line

based on 2 Shipping Container 10'		
Length	mm	2 990
Wide	mm	2 440
Height	mm	7 700
Weight (total)	t	15
Engine power	kW	13
Connector plug CEE	A	32

Moveable seed conditioning plant with downstream coating system
